EXPERIMENT - 10

10. Perform a 90-degree rotation clockwise along the y-axis for the given image.

Aim

To rotate a given image by 90 degrees clockwise using Python and OpenCV.

Procedure

1. Import the OpenCV library.
2. Read the input image using cv2.imread().
3. Rotate the image by 90 degrees clockwise using cv2.ROTATE_90_CLOCKWISE.
4. Display the original and rotated images.
5. Close all windows.

Program

```
import cv2

img = cv2.imread("input.jpg")

if img is None:
    print("Image not found")
else:
    rotated = cv2.rotate(img, cv2.ROTATE_90_CLOCKWISE)

    cv2.imshow("Original Image", img)
    cv2.imshow("Rotated Image", rotated)

    cv2.waitKey(0)
    cv2.destroyAllWindows()
```

Sample Input

Sample Output

Original Image

90° Clockwise Rotated Image

Result

Thus, the given image was successfully rotated by 90 degrees clockwise using OpenCV.
